Duplicate Order Control

Introduction

This Add-on will control duplicate order.

By enabling this module the recurrence of order numbers in Sales Orders as well as Purchase orders are controlled.

Important!

As a best practice it is advisable to take back up of your company data before installing the Add-on

Setup Guide

1. Activate the Add-on

For Tally.ERP 9 Series A version lower than Release 3.2

Go to **Gateway of Tally > F11: Features > Accounting Features**

Set "Yes" to the options "**Enable Duplicate Order Control**"

For Tally.ERP 9 Series A Release 3.2 and above

Go to **Gateway of Tally > F11: Features > Add-on Features**

Set "Yes" to the options "**Enable Duplicate Order Control**"

2. Add-on details with images.

- Enter a Purchase Order.
- Capture the PO number during the entry of PO transaction. E.g. we record a purchase order with order number 32.
- Complete the transaction by selecting the stock items.

Purchase Order No. 1		1-Apr-2010 Thursday	
Party's A/c Name : A.K.S. MARKETING		Order No. : 32	
Current Balance : 2,62,500.00 Dr			
Purchase Ledger : Purchase A/c			
Name of Item	Quantity	Rate per	Amount
Alluminium Pressure Cooker	100.00 Nos	3,000.00 Nos	3,00,000.00
Narration:			<u>100.00 Nos</u> <u>3,00,000.00</u>

Now, while recording another PO, if the same PO number (in this case 32) is used, the system will not allow the user to continue. The duplication of Purchase Order number is restricted which is shown as below.

Current Balance : 2,62,500.00 Dr
